Detector Upgrades – CDF:

- Complete replacement of the central tracking systems.
  - New central drift chamber
  - New Silicon Vertex Detector (5 Layers Double Sided)
    - 2x as long to cover most of luminous region
    - 3-D Tracking (Stereo Strips)
  - Intermediate Silicon Tracking (w/ SVX, good ID to small ang.)
- New data aquisition system, trigger system, Frontend Elec.
- Replacement of the calorimeters in the forward/backward direction.
- Upgrade to the muon detection system. (Greater coverage)
