Summary of New Chambers

BaBar:

- Shortest (radial) chamber, low mass
- No cathodes, most Silicon
- Flat endplates, *Be* inner cylinder
- Decoupled super-layers
- Flattened hex cell

Belle:

- 3 inner cathodes (use in trigger); fewest stereo
- Thinnest endplates
- CFRP cylinders
- Large radial dip at stereo super-layer edge

CLEO3:

- Evolution of existing design with subtle tweaks
- 1 outer cathode for PID pointing
- Thinnest inner cylinder
- Smaller stereo angle, but more layers
